

## Reparatur- und Ersatzteilservice

If you have troubles with your Delem controller, please contact us. In many cases we are able to help our customers by telephone support.

If it is necessary to change electrical parts we will send you the required spareparts very quickly to reduce machine downtime.

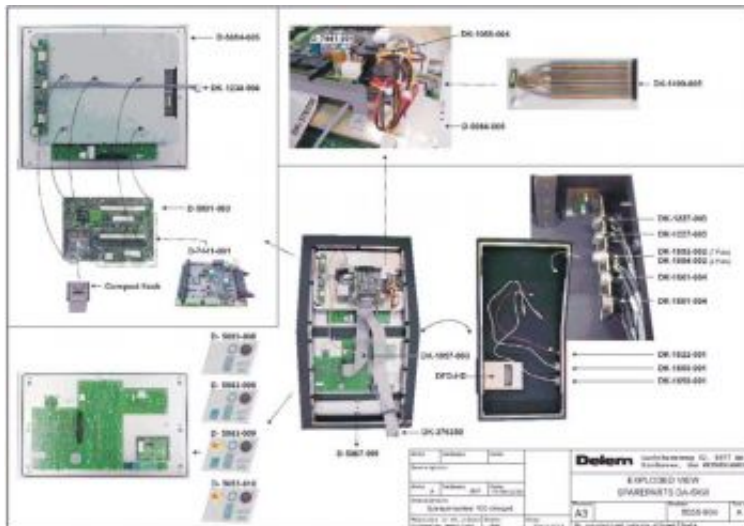

It is also possible to send back the failed device into the Delem workshop. Within a very short time it will be repaired and checked by Delem repair specialists.

And we provide an on-site repair service as well. We send a specialist to you for repairing and adjusting your shear or pressbrake.

When executing this repair order we can use this opportunity also to train your service technicians

You should contact us so that we can decide which is the best way for a quick help.

## Technical Service Manuals of Delem Shears and Pressbrake Controls

If you need any service documents, software updates or any technical assistance, don't hesitate to contact us. You are welcome !
